With the help of this simple and user-friendly wallet, you data is now safer than ever before. Simply type in the search bar in the top left of the app, and choose from the list of items that you want to add to your wallet. The most common items that people want to add to their wallet are, of course, website logins and passwords. But you can also add PIN numbers, any confidential notes, names, addresses, contacts, medical info, financial records, documents, images, and other important items. The more items you add, the better you will be able to manage the information. Once you have successfully added the information you want to add to your wallet, you can give the wallet a name and access a folder for it. After that, you can choose to store the wallet on your desktop (recommended) or in the cloud. When you store it on your desktop, you can access it at anytime and anywhere and you can also download it on your phone. The "Move to Cloud" option allows you to store your wallet in the cloud so you can access it from anywhere and it will be updated in real-time. This can be very useful if you travel a lot or you are working from home and would like to access your wallet from your laptop or any other computer. After that, you can share the wallet with anyone you want. With the help of this wallet, you can access your wallet and dad any item you want to share a website password or PIN number with your friends via email, SMS, or instant message.
